5.3. Advice for firefighters	
Firefighting instructions	Trisilane should be allowed to burn until consumed. Excessive pressure may develop in gas cylinders exposed to fire-heated may explode on contact with air. Cool cylinders and surroundings with water from a suitable distance. Exercise caution when fighting any chemical fire. In case of fire: Stop leak if safe to do so.
Protection during firefighting	: Do not enter fire area without proper protective equipment, including respiratory protection. Avoid all eye and skin contact and do not breathe vapor and mist.
<b>SECTION 6: Accidental release n</b>	neasures
6.1. Personal precautions, protectiv	re equipment and emergency procedures
6.1.1. For non-emergency personnel	
Emergency procedures	: Evacuate unnecessary personnel.
6.1.2. For emergency responders	
Protective equipment	: Equip cleanup crew with proper protection.
Emergency procedures	: Stop leak if safe to do so.
6.2. Environmental precautions	
	Notify authorities if liquid enters sewers or public waters.
6.3. Methods and material for conta	inment and cleaning up
Methods for cleaning up	: Stop flow of gas if possible. Evacuate area. The potential exists for spontaneous ignition and explosion. Allow vapors to disperse. Ventilate area.
6.4. Reference to other sections	
See Heading 8. Exposure controls and pers	sonal protection.
<b>SECTION 7: Handling and storage</b>	je
7.1. Precautions for safe handling	
Additional hazards when processed	: Handle empty containers with care because residual vapors are flammable. Catches fire spontaneously if exposed to air.
Precautions for safe handling	: Containers must be properly grounded before beginning transfer. Handle only in sealed purged systems. Prevent reverse flow. Provide good ventilation in process area to prevent accumulation of vapors. Do not allow contact with air. Do not breathe vapors. Systems utilizing silane that do not involve complete consumption of silane should be equipped with burn boxes. See- Book of SEMI Standards, Facilities Standards and Safety Guidelines, Mountain View, CA, Semiconductor Equipment and Materials Int'l, 1993.
Hygiene measures	: Wash hands thoroughly after handling. Wash contaminated clothing before reuse.
7.2. Conditions for safe storage, inc	luding any incompatibilities
Technical measures	: Store contents under dry inert atmosphere.

## SECTION 10: Stability and reactivity

10.1. Reactivity

No additional information available

## 10.2. Chemical stability

Stable in sealed cylinders stored under a dry inert atmosphere.

## 10.3. Possibility of hazardous reactions

Catches fire spontaneously if exposed to air. Reacts with oxygen in air, igniting spontaneously. Mixtures with mercury explode when shaken in the presence of air. Platinum, platinum and iron salts and other Lewis acids can cause generation of flammable hydrogen gas.

## 10.4. Conditions to avoid

Open flame. Heat. Sparks. Do not allow contact with air.

## 10.5. Incompatible materials

Acids. Alcohols. Oxidizing agent. Water.

**10.6.** Hazardous decomposition products

Silicon dioxide.
